

Titan™ Tabs

Disinfectant Cleaner

Effervescent disinfectant cleaner tablets for hard surfaces and floors, formulated for general and specialty cleaning and disinfection.

The key ingredients in Titan™ Tabs deliver powerful, bleach-free surface cleaning and disinfection in a formula that is responsible for people, surfaces and equipment.

Features & Benefits

- Kills 99.9999% of bacteria *Pseudomonas aeruginosa* and *Staphylococcus aureus* in biofilms on a hard, non-porous surfaces
- Effective against *Clostridium difficile* spores in 4 minutes
- Delivers the disinfection power of bleach-based disinfectants in a more compact, more convenient, easy-to-dispense form
- A responsible alternative to bleach-based disinfectants with a less corrosive effect on surfaces and equipment

Applications

- Cleaning and disinfection of hard surfaces and floors in:
 - Hospitals, nursing homes, medical and dental offices and clinics, operating rooms, isolation wards, and medical research facilities
 - Veterinary clinics, animal life science laboratories, kennels, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities
 - Cosmetic, pharmaceutical, and medical device manufacturing facilities, biotechnology firms, pharmacies, and compounding pharmacies

Titan™ Tabs provide effective cleaning strength that will not dull high gloss floor finishes with repeated use

Use instructions*

- **For General Disinfection:** Prepare a 538 ppm solution; refer to Dilution Chart on product package. Apply to surface with mop, cloth, sponge, brush, wipe or spray. Allow surface to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted.
- **For Virucidal Disinfection:** Prepare a 1,076 ppm solution; refer to Dilution Chart on product package. Apply use solution to pre-cleaned, hard, non-porous, inanimate surfaces with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove product by wiping with brush, sponge, or cloth. For sprayer applications use a coarse spray device. Spray 6-8 inches from surface, and rub with brush, sponge, wipe or cloth. Do not breathe spray mist.
- **For General Cleaning and Disinfection:** Prepare a 4,306 ppm solution; refer to Dilution Chart on product package. Apply to surface with mop, cloth, sponge, brush, wipe, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted.
- **For Disinfection of Surfaces Contaminated With *Clostridium Difficile*:** Prepare a 4,306 ppm solution; refer to Dilution Chart on product package. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes.

Effervescent Disinfectant Cleaner Tablets

- 538 ppm dilution — Bactericidal, and Fungicidal, including antibiotic resistant bacteria, in 10 minutes.
- 1,076 ppm dilution — Virucidal in 10 minutes.
- 4,306 ppm dilution — General cleaning and disinfection in 4 minutes.
- 4,306 ppm dilution — Disinfection of Surfaces Contaminated With *Clostridium difficile* in 4 minutes.
